

Success of Prostate Treatment with Dr Allen's Device Propels a New Kidney Stone Trial

Dr Allen's Device is proven to treat prostate enlargement, known as benign prostatic hyperplasia (BPH), and chronic prostatitis up to full recovery and without any side effects. The success of this treatment has paved the foundation for a new breakthrough clinical study on Dr Allen's Device as an effective kidney stone treatment.

MEN'S HEALTH

The effectiveness of the non-invasive treatment with Dr Allen's Device has been proven in 2 clinical trials and multiple case studies across 10 years of scientific observation. The data has been published in many scientific articles, such as "Benign Prostatic Hyperplasia and Kidney Stone Disease Thermobalancing Therapy with Dr Allen's Device: Key to Successful Ageing Without Medications, Surgery, and Risky Exposure to Coronavirus Infection"
<https://sites.kowsarpub.com/num/articles/110771.html>.

The essence of this therapy is the improvement of blood circulation in the affected organs. Dr Allen's Device relieves chronic pain and other troubling symptoms naturally, targeting health problems at their root.

Thermobalancing therapy and Dr Allen's Device are USPTO-patented that confirms the uniqueness of this natural treatment. Since 2010, Dr Allen's Device has been registered with the MHRA, a medical regulatory healthcare agency in Great Britain, so its safety is approved.

Standard BPH and Prostatitis treatments may cause serious side effects

Pros and cons of different prostate treatments ought to be weighed carefully, as many side effects of standard medications and surgeries often cause new health problems:

1. Antibiotics and anti-inflammatory drugs may suppress the immune system, cause allergies, develop cardiovascular, liver and kidney diseases.
2. 5-alpha-reductase inhibitors may lead to a hormonal imbalance. Finasteride and Avodart may cause impotence, depression and even diabetes.
3. Alpha blockers can cause retrograde ejaculation, semen loss, testicular pain, depression, and erectile dysfunction.
4. Prostate massage can damage the delicate tissue of the prostate gland, causing bleeding around the prostate, the formation of prostate calculi, acute epididymitis, etc.
5. All surgical procedures for the prostate destroy it and often cause irreversible complications and, consequently, depression.

In contrast, Dr Allen's Device and Thermobalancing therapy treat prostate enlargement and chronic prostatitis without side effects.

New clinical trial on Dr Allen's Device for kidney stones

Backed by empirical data showing that Dr Allen's Device dissolves kidney stones, Fine Treatment has initiated a new clinical study on the efficacy of Thermobalancing therapy for kidney stone disease. This healthcare innovation project has received a grant from the European Union Development Fund and OxLEP Business.

The importance of Fine Treatment's innovation project for kidney stone patients

At present, all standard kidney stone treatments cause side effects and are highly costly.

The most common medical procedures are extracorporeal shock wave lithotripsy (ESWL) and percutaneous nephrolithotomy (PCNL). ESWL is used to break up a kidney stone into smaller pieces that may pass with urine. PCNL surgically removes larger stones. Sadly, ESWL and PCNL can damage kidneys and cause severe side effects, including high blood pressure and chronic kidney disease (CKD).

Research shows that 50% of patients develop new kidney stones within 5 years. A repeated surgical procedure increases risks to patients and can worsen their overall health.

Kidney Stone Treatment with Non-invasive Dr Allen's Device

Thermobalancing therapy improves blood circulation in kidneys, tackling the cause of kidney stone formation. The design of Dr Allen's Device for Kidney Treatment makes it easy to use. This at-home treatment has no side effects, so compared to surgical kidney stone removals, it is a breakthrough innovation in the treatment of kidney stone disease.

Non-invasive Dr Allen's Device for Kidney Treatment

Fine Treatment <https://finetreatment.com/> conducts innovative healthcare research and development, and enables the use of their patented medical technology and Dr Allen's Devices across the globe. Fine Treatment is the UK Department for International Trade registered supplier to international buyers. Dr Allen's Devices for BPH, chronic prostatitis, back pain, and kidney stone treatment offer a great value for money. For over a decade, thousands of customers have been choosing Dr Allen's Device to enjoy an effective at-home treatment.
